## Geography

### Autumn 1 2023

## Spatial Sense

### Key Vocabulary

Aerial View	What something looks like from above
Compass	A tool used to find directions
Key	A tool used to show what symbols are on a map
Location	The place where something is
Map	A picture showing where things are located
Navigate	To find a way
Symbol	A picture on a map that represents something

A compass has 4 main points: North, East, South and West

Compasses are used to show the direction in which you travelling on foot or using transport. The use of a compass is an essential instrument for map work, route finding, navigation and other outdoor life experiences. Many tablets and phones now have a built-in compass. Most are used when placed on a flat surface or held horizontally
