

Year 1 and 2

Swallows and Swifts

Science

We will be investigating the best way to grow cress seeds.

We will be investigating whether we can grow beans in bags.

Key vocabulary

Root- These anchor the plant to the ground and absorb water and nutrients.

Stem- This carries the nutrients from the soil to the leaves. The trunk of a tree is a stem.

Leaves- These make food for the plant.

Flower- These make seeds to develop into new plants.

Seed- These germinate and new plants grow from them.

Germinate- When a seed swells up and bursts out of its shell.

Sprout- When a plant sprouts, it is growing new shoots.

Shoot- A shoot grows upwards and becomes a stem.
