

Year 2 Science Autumn 1

The human body

Key Vocabulary	Definition
Circulation	How oxygen is moved around the body.
Digestion	Breaking food down so that the nutrition can be used and the waste pass through the body.
Disease	Illness or sickness.
Hygiene	Keeping our hands and bodies clean and free from germs that may cause illness,
Nerves	Fibres that send messages to and from the brain.
Pulse	The beating of the heart that can be felt in the wrist or neck.
Veins/arteries	Tiny tubes that carry blood around d the body.

Hygiene

The best way to keep yourself healthy is to practise **good hygiene**. Wash your hands, with soap; brush your teeth; change and wash your clothes, body and hair regularly. This will keep away most germs.

Skeletal muscle

These work in pairs to move the bones they are attached to by taking it in turns to contract (get shorter) and relax.

The biceps muscle contracting to bend the arm.
