|---|---------------------------|--|--|--|
| Key VocabularyDefinitionbatteryA store of energy.circuitA path in which electricity flows around.conductorAn electrical conductor allows electricity to flow through it.electricityElectricity is a form of energy that helps to make things work.electrical currentThe flow of electricity.electric shockIf we allow electrical current to flow through our body, it can hurt us.light bulbA piece of equipment that converts electricity to travel through it.switchA piece of equipment that can make or break an electrical circuit. | | Science | | |
| batteryA store of energy.circuitA path in which electricity flows around.conductorAn electrical conductor allows electricity to flow through it.electricityElectricity is a form of energy that helps to make things work.electrical currentThe flow of electricity.electric shockIf we allow electrical current to flow through our body, it can hurt us.light bulbA piece of equipment that converts electrical energy to light energy.insulatorAn electrical insulator does not allow electricity to travel through it.switchA piece of equipment that can make or break an electrical circuit. | $\boldsymbol{\heartsuit}$ | Spring 1 😥 | | |
| circuitA path in which electricity flows around.conductorAn electrical conductor allows electricity to flow through it.electricityElectricity is a form of energy that helps to make things work.electrical currentThe flow of electricity.electric shockIf we allow electrical current to flow through our body, it can hurt us.light bulbA piece of equipment that converts electrical energy to light energy.insulatorAn electrical insulator does not allow electricity to travel through it.switchA piece of equipment that can make or break an electrical circuit. | Key Vocabulary | Definition | | |
| conductorAn electrical conductor allows electricity to flow through it.electricityElectricity is a form of energy that helps to make things work.electrical currentThe flow of electricity.electric shockIf we allow electrical current to flow through our body, it can hurt us.light bulbA piece of equipment that converts electrical energy to light energy.insulatorAn electrical insulator does not allow electricity to travel through it.switchA piece of equipment that can make or break an electrical circuit. | battery | A store of energy. | | |
| electricityElectricity is a form of energy that helps to make things work.electrical currentThe flow of electricity.electric shockIf we allow electrical current to flow through our body, it can hurt us.light bulbA piece of equipment that converts electrical energy to light energy.insulatorAn electrical insulator does not allow electricity to travel through it.switchA piece of equipment that can make or break an electrical circuit. | circuit | A path in which electricity flows around. | | |
| electrical current The flow of electricity. electric shock If we allow electrical current to flow through our body, it can hurt us. light bulb A piece of equipment that converts electrical energy to light energy. insulator An electrical insulator does not allow electricity to travel through it. switch A piece of equipment that can make or break an electrical circuit. | conductor | An electrical conductor allows electricity to flow through it. | | |
| electric shock If we allow electrical current to flow through our body, it can hurt us. light bulb A piece of equipment that converts electrical energy to light energy. insulator An electrical insulator does not allow electricity to travel through it. switch A piece of equipment that can make or break an electrical circuit. | electricity | Electricity is a form of energy that helps to make things work. | | |
| light bulb A piece of equipment that converts electrical energy to light energy. insulator An electrical insulator does not allow electricity to travel through it. switch A piece of equipment that can make or break an electrical circuit. | electrical current | The flow of electricity. | | |
| insulator An electrical insulator does not allow electricity to travel through it. switch A piece of equipment that can make or break an electrical circuit. | electric shock | If we allow electrical current to flow through our body, it can hurt us. | | |
| switch A piece of equipment that can make or break an electrical circuit. | light bulb | A piece of equipment that converts electrical energy to light energy. | | |
| | insulator | An electrical insulator does not allow electricity to travel through it. | | |
| wire A thin piece of metal (usually covered in plastic) that allows electricity to flow through | switch | A piece of equipment that can make or break an electrical circuit. | | |
| | wire | A thin piece of metal (usually covered in pla | A thin piece of metal (usually covered in plastic) that allows electricity to flow through it. | |
