

# Year 2 Geography Autumn 1 2025

## Spatial Sense

Key Vocabulary	Definition
<b>destination</b>	The place that you want to go to.
<b>directions</b>	How to get to somewhere.
<b>Equator</b>	An imaginary line around the earth that divides the Northern Hemisphere from the Southern Hemisphere
<b>globe</b>	A 3D representation of the world.
<b>landmarks</b>	An object or a feature of a landscape or town that has importance or makes a place easily recognizable
<b>location</b>	The place where something is.
<b>map</b>	A 2D representation that shows where places are located.
<b>Ordnance Survey</b>	An organisation that produces detailed maps in the UK.
<b>scale</b>	The size of a map compared to the actual size of the area it is showing: maps are much smaller than the real places they show
<b>symbols</b>	Small pictures that are used to represent geographical features.

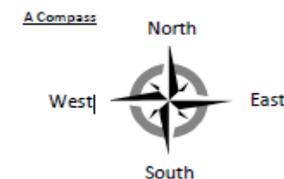

### Ordnance Survey maps

Ordnance Survey (OS) maps are detailed, large-scale maps of Great Britain created by the Ordnance Survey, the national mapping agency. These show a representation of a place using a well-known system of coloured lines symbols and other representations of the landscape.

### A Compass

A compass is a tool that helps you find directions. It points towards the Earth's magnetic north, helping you figure out which way is north, south, east, and west. Knowing these directions is important for navigation, whether you're following a map or finding your way in the outdoors.

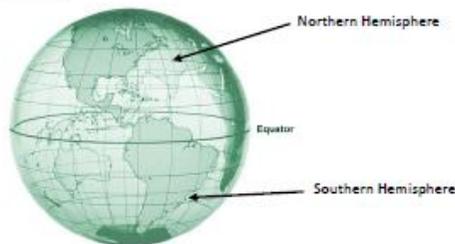

### A Globe

Globes are 3D models of the earth.

### The hemispheres and the Equator

The Globe

The Earth is like a giant ball, and an imaginary line called the equator splits it into two halves called hemispheres. The top half is the Northern Hemisphere, and the bottom half is the Southern Hemisphere. We live in the Northern Hemisphere.
