Key physical features

Durdle Dor-
coastal erosion.

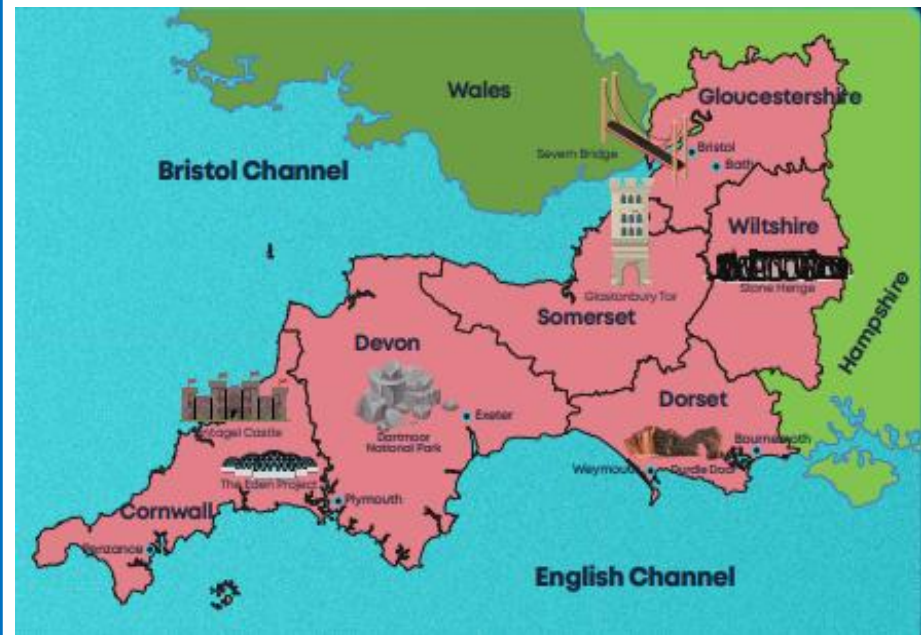

Lyme Regis
The Jurassic Coast

Cape Cornwall
Bays and rugged cliffs

Map showing counties of the South-West region of England with key features and tourist areas of interest.

How does erosion change the coastline?

- 1: Caves can form where there is a weakness or crack in the rock.
- 2: Erosion may cause the cave to extend through the headland to form an arch
- 3: Over time, the archway may collapse.
- 4: A stack is left.
- 5: This further erodes to leave a stump.
