Creating media:

Digital painting

Comparing

Digital painting and painting a picture on paper involve different skills. We are able to compare these skills to determine which one we prefer.

Key Vocabulary	Definition
compare	To note the similarity and difference between things
computer	An electronic device for storing and processing data
digital	Involving the use of computer technology
edit	To make changes to the image.
e-safety	The safe and responsible use of technology
information technology	The study or the use of computers for storing, retrieving and sending information.
load	To get the work back up which you had saved before closing the last time.
paint	The action or skill of using paint, either in a picture or as decoration A software program which allows digital creation of art.
pointillism	A technique of painting using tiny dots of various pure colours
program	A series of coded software instructions to control the operation of a computer or other machine
tools	A special program or digital helper on a computer that lets you make, fix, or do something fun.

Saving your work

Many artists who create their work digitally always save their work. This is so they are able to go back to it and make changes to it whenever they need to. If they did not save their work they would need to restart every time, which would be a huge waste of time. Some pieces of work can take months to complete so learning to save work can be extremely helpful.

How to make a digital picture

1. Choose a tool
2. Choose a colour
3. Click and drag
4. Fix mistakes
5. Save your picture.

E-safety: Online relationships

Relationships and behaviours that may lead to harm and how positive online interaction can empower and amplify voice. It is important to ask a trusted adult for permission when doing something online. This keeps people safe from harm and from others when they are online.

Tools

The tools on Paint are designed to help the user create different types of pictures. The tools that will be used include:

- Paintbrush
- Pencil
- Undo
- Spray paint

Paint

Paint is a digital program which can be used on a computer, laptop or iPad. Paint is a program which is used to create and edit pictures digitally. It has several different tools which are simple to use in order to create lots of different types of pictures.
